

REMARKS

In response to the restriction requirement, applicants select Group I (claims 1-8) with traverse.

The restriction requirement has been justified on the grounds that the product can be used in a materially different way "such as providing as part of a hologram recording medium or for making a plasma display panel." It is respectfully submitted that on the current record, this is gross speculation and insufficient to support a restriction requirement. Note further that all of the non-elected claims are dependent, directly or indirectly, on the claims of Group I. Under those circumstances, it is respectfully submitted that all claims should be examined in this case.

Withdrawal of the restriction requirement and early further consideration and allowance of this application is respectfully requested.

Dated: April 4, 2005

Respectfully submitted,

By Edward A. Meilman
